

Project

HOUSE VG

Architects

LRARCHITECTES

Address

Rue de la Saisine, 7060 Thieusies

Programme

Low-energy single-family house with concrete and wood.

About

The year 2010 saw the project lead simple and consistent we are working on for almost 3 years. It offers open living spaces flowing south to the north protected by a veil of concrete and the floor of the wooden box installed in the rooms is at odds to avoid overheating in summer.

Constructive choices choose the inertia of the concrete on the ground floor and the wooden frame for the floor, the house will benefit from isolation of tissue, a mechanical ventilation and heating floor powered by a aérothermal heat pump. Photovoltaic solar panels will be installed on the roof.

Typology

Private houses

Status

Built

Conception

2006

Delivery

2010
