SCHOOL BARVAUX-CONDROZ

Project	
Architects	LRARCHITECTES
Address	Route de Dinant 23, 5370 Barvaux-Condroz
Programe	Communal school low energy with slate.
About	The location and orientation are driving this project. To maximize the surfaces intended for classes, our choice was to position the horizontal circulation outside the front south for articulating the entrance to the dining room extension. The energy approach can be summarized in four main areas: [1] The orientation using the double skin façade and the inertia of the existing building to make the most of free solar heat [2] The breakdown for a recovery of calories [3] The insulation of the envelope from the outside by means of a facing made of slate cladding [4] The low temperature floor heating The aim is to include this project in an integrated global HEQ an educational dimension.
Typology	Education
Status	Built
Conception	2008
Delivery	2011
Client	Administration Communale d'Havelange
Total budget	687 000
Per square meters	1 490
Area	460 + caves + greniers

Rue de Libersart 1B
1457 Tourinnes-Saint-Lambert
