About

Presented at the 2017 edition of the MIPIM in Cannes, this tower reflects the ambition of the Spits Office to revealed on the international scene.

Like other projects of the office, the Sky Peak embodies the pure and angular lines dear to the architect of Visé. A modern response to the development of Liège, and a dynamic signal from a region on the international level. This tower exceeding 100 meters at the top of its twisting arrows, accommodates offices and commerce, including the sporting part of city life.
