Programme

Hôtel de Police / Extension de Charleroi Danses - Charleroi.

OTHER PROJECTS :

About

Beside preserving two remarkable wings of an existing cavalry building and adapting them according to low energy standards, this sustainable project includes a third vertical wing: a 75-meter new elliptical passive tower clad in blue bricks that accommodates very flexible police offices and facilities. Charleroi/Danses extension houses dance studios and residences for artists, located in small brick buildings that help preserving a human scale. A tent on the roof houses the new foyer-belvedere. All the elements of the complex are connected by a large public square directly accessible from the street and a public café invites life to enter the plaza. The unusual ensemble creates a green landmark for the city of Charleroi.
