## About

Following the latest evolutions regarding training and education, SumProject has achieved an open learning centre for the 6.000 students studying business administration, engineering and landscape architecture. The building hosts a multimedia center, a library, an auditorium with 350 seats, various work and meeting rooms and a restaurant. As such, it offers a pleasant study environment where each student can evolve autonomously at his/her own pace. This luminous building is stretched along a covered path, which is also one of the new major streets of the campus.

## OTHER PROJECTS :

Layout of the Lys' riverbanks and surroundings  
- 1997-2005 2005-2010  
- Courtrai

Saint-Cyr House
