

Project

JODOIGNE POLICE STATION

Architects

SYNTAXE ARCHITECTS

Address

Chaussée de Tirlemont, 1370 Jodoigne

Programme

Construction of a 3.000 sqm Police station, with offices, cellular complex and parkings.
Low-energy building with a high performance envelope, a green roof and a super insulating bullet proof glazing.

About

The project takes place in the city center, but its function needs a visibility such that no confusion, no assimilation must arise from the architecture. The vocation of a Police station and its constantly renewed public mission, clearly makes the difference with other activities in urban areas (shops, recreation, government, etc.).
The design was based on a pedestal, which takes advantage of the uneven ground level to host the cellular complex, parkings and archives. The split level allows penetration of natural light and ventilation. Above, the shape of the building ("L") can simultaneously

- Respect the existing alignment,
- Form a small "plaza" entrance,
- Move backward part of the building,
- Link in a intelligent and efficient way the front of house (public access) with the rear of the plot (staff access), using a "backbone" circulation, largely glazed, which serves all the functions within.

Typology

Civic and community

Status

Built

Conception

2008

Delivery

2012

Client

Zone de Police de Jodoigne

Total budget

4.000.000

Per square meters

1.330

Area

3.000
