

Project

ORANGE36A

Architects

V2W ARCHITECTES SPRL

Address

Avenue du Prince d'Orange, 36A, 1180 Bruxelles

Programme

The proposed extension of this single family home was from the start, closely linked to assessments of the existing dwelling built by the same owner 20 years ago.

About

Beside a conventional construction, heavy and energetically inefficient, the extension offers a wood-frame construction to a considerable isolation; its lightness is appropriate to the basement and presents a favorable ecological balance. A living / dining room, kitchen and bedrooms upstairs occupies this volume consists of two trays fully opened allowing flexibility for development.

The simple volume and pierced by many windows illustrates the flexibility of the interior space but also a willingness to be open to the surrounding vegetation.

The finishes also reflect the simple character, flexible and environmentally satisfactory. Wood, present in various forms - solid, boards, panels or laminated - is left visible.

Typology

Private houses

Status

Built

Conception

2005

Delivery

2007

Client

Vervan S.A.
