

Project

ENERSOL

Architects

&SENS ARCHITECTES

Address

4651 Battice

Programme

Passive new construction of offices and studios.

About

Enersol wished that his headquarters reflects its activity in the solar energy and the energy saving. FHW architects designed a resolutely contemporary, passive building with " positive energy ". It is to be said beyond the zero CO2 emission. The technical and architectural choices of the project are guided by the environmental protection. The extensive vegetation on the roof of the halls of storage in connection with the existing context reduces the industrial character.

Typology

Offices (include mixed use)

Status

Built

Conception

2014

Delivery

2014

Client

Enersol Sprl

Total budget

3 500 875

Stability

Schneiders sprl
