Project	# ECO-RENOVATION OF A BUILDING OF SOCIAL HOUSING
Architects	FP ARCHITECTES SC SPRL
Address	Rue Saint-Léonard 44, 4000 Liège
Programe	Renovation of a building of two social housing following the criteria of energy performance "low energy" - creation of a vegetable facade
About	The project fits in the project sustainable city of the Federal Plan of big cities policy. Ideally located, this former building of housing now disused has a remarkable visibility. Indeed, the lateral facade has a wide open pinion which marks the entrance to the Saint-Léonard district. This strategic position will be to profit with emphasis on the valorization of this blind made gable by the successive changes in the rack. We propose to use this gear as a new façade, favourably oriented west / southwest, offering in height of the views on the place of the deportees. Of existing buildings, we will not keep only the main body, strongly degraded successive annexes but no particular quality. It will also enhance the Interior of island which has the particularity to include landlocked housing. By reducing the grip of the existing buildings, we can provide new collective spaces, a private garden and reduce the opposite. The project proposes the renovation of two housing units for large families. Each housing is built in duplex; they are composed of four rooms each.
Typology	Housing (include mixed use)
Status	Ongoing building work
Conception	2010
Delivery	2012
Client	La Ville de Liège
Total budget	356.971 euros HTVA
