ACROSS: LECTURE SERIES - ANVERS/LIÈGE

The lecture series ACROSS gives the floor to architects from various corners of the country that have set up their own practice over the past decade. During this exchange, which will take place alternately in Antwerp and Liège, they will talk about their experience and the specific physical and social context in which they operate. This year, each conference will be presented by a senior architect from the other linguistic community.

This series of lectures is an initiative of A + Architecture in Belgium, co-produced with the Vlaams Architectuurinstituut (VAi) and the Faculty of Architecture of the Université de Liège.
