NEY & PARTNERS: EXHIBITION DOBUKU, TOKYO

The exhibition DOBOKU: Civil Engineering in Gallery 21_21 Design Sight presents the footbridge Park Spoor Noord in Antwerp from Ney & Partners. Doboku, in English civil engineering, comprises things indispensable to our daily lives, such as roads, railroads and other transportation networks; mobile phones, the Internet and other communications technologies; and waterworks, disaster countermeasures and other infrastructure. The exhibition aims to look at these things once again, rediscover and experience them, and create an opportunity to consider an even better future.
