NEY & PARTNERS WINNER OF PROJECT TEAM COMPETITION FOR THE ALBI FOOTBRIDGE

The pedestrian and cyclist bridge attached to the existing railway bridge spans the Tarn, offering walkers fresh perspectives on the historical city.

The siting of the structure has been chosen to facilitate natural and fluid mobility between districts and to offer a comfortable and pleasing link for the people of Albi as well as for its many visitors.

Ney & Partners is working on this project with Grontmij France , REC- Architecture, Public Scene , ETB and Jean- Louis Rebière.
