## PLAN 9, BUREAU D'ARCHITECTES SPRL

Description

Established in 1996 and composed by 5 architects, Plan 9 wanders, sketchbook in the pocket, in modern and modernist architecture: clean lines, simple volumes, subordination of form to function, etc.. Plan 9 returns the rules to offer its decade of experience in passive and semi passive buildings.

Seventeen years of experience make Plan 9, a leader of modern architecture in Liège: energy renovations, new homes, shopping centers and industrial buildings.

Research driven, excited by the fundamental energy issue and the need to always see further serious and professional architects of Plan 9 form before any team magnet push back its own limits and out of the hair-raising projects.

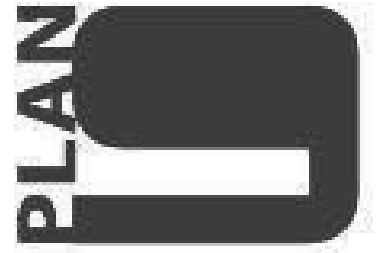

On your turn, take the time to discover the best of our work ...
