LEITMOTIV ARCHITECTURE

Description

Active since 2009 in Liège and Brussels, Leitmotiv Architecture promotes a creative, pragmatic, efficient and sustainable approach in the development of architectural projects .

We work with private clients, government (ULG, Commune of Berloz, Commune of Soumagne), social-cultural (Infor-Jeunes, MuziekPublique) and professionals (Calzedonia Finanziaria, Bemac SA, Assurco SPRL).

For each project we define a new creative line to provide the most adapted response depending on the specific opportunities and constraints.

We consider the relationship of a project to its environment (built, natural , social, political , historical, economic) as a driving force in our creative process. We defend a voluntary and non-conformist approach for this aspect .

Our curiosity for art feeds our analysis methods. We define a driver concept that we apply in forms and spaces to create a coherent and relevant architectural project.

The spatial and energy efficiency, the constant search for economic solutions, the use of simple techniques and durable materials are our constant concerns.

Creation

2009

Associates

Olivier EVENS, architecte, PEB, PAE, PHPP
Thomas DEGEE, architecte

Awards

Winner Bâtiment Exemplaire 2011, Renovation of 2 duplex "very low energy"
