

Architects

## ESTATE ESTATE

Description

Justine Lemesre and Victor Launay are two architects based in Brussels. In 2013, they create estate estate an architecture office without area of predilection. Together they share a common vision avoiding to produce a standardized architecture. Forming a young French and Belgian team, Justine and Victor are always looking for newness and have as leitmotivs finding balance between enthusiasm and fatalism. Their conviction is that each project asks for a singular approach. They explore without prohibition references, context, gratuity and spontaneousness.
