Architects

BUREAU D?ARCHITECTURE GREISCH SCRL

Description

greisch architecture office, created by Philippe Greisch and established in Herstal-Liège accounts for 14 persons. The team is dealing in several architecture domains : renovations, refitting, catering, reassignment, public or private buildings has a long standing experience in the management and the direction of diverse architectural projects.
Thanks to its investigation and team spirit, its permanent renewal and dynamism, its invention allied to imagination, greisch architecture office is able to take care of an entire mission of a project from its initial conception to the studies of execution for the architecture part and in association with diverse engineering consulting firm for the stability and/or the technical equipments. Greisch architecture office working approach is based on efficiency, rationality and quality criterias. The particularity of the office is to offer integrated solutions in both a pragmatism and functional spirit, within the framework of a range of activities. The optimization of the treatments in the acoustic, thermal and renewable energies point of view leads us to participate to the conception of long-lasting buildings. The multi disciplinary team of architects, acousticians, thermal specialists, renewable energy specialists, public market specialists,?bring their expertise and allow to offer tangible, simple and thrifty solutions.
