# HOUSING VERDURE

Architects

B612 ASSOCIATES

chaussée de Waterloo 1253  
1180 Bruxelles

Address

Rue de la Verdure et rue du Dam, 1000 Bruxelles

Tél : 32 2 732 96 93  
Fax : 32 2 735 05 92

Programme

The programme envisions the construction of a building with 10 apartments in the framework of the contract of the Notre Dame au Rouge Van Artevelde neighbourhood. It concerns social housing apartments varying from 2 to 5 rooms for normal and big families. The apartments on the ground floor can accommodate disabled people. The project is situated between Dam street and Verdure street opposite two tall social building blocks.

- Bruxelles (Ixelles)

Housing units Dolez  
- 2005 2010  
- Uccle

Nursery and Eco-housing Bruyn  
- 2008 2012  
- Bruxelles

Passive Housing Plume  
- 2006 2012  
- Bruxelles

About

The prize winning project of B612 Associates begins with a series of observations arising from an analysis of the urban context and the opportunities it suggested. The plot is faced with empty spaces outside the scale of the street due to the cleared areas surrounding the social housing blocks; It appeared essential to reinforce the continuity of the blocks to stabilize the image of the neighbourhood, the two streets being equally narrow and dense. The site is close to Rue d'Artois, which has numerous gaps and indentations between the volumes. Based on this particular feature, the architects transposed the concept onto the plot in question, with a volume aligned with its neighbours on the Rue de la Verdure but set far back in the central part on the Rue du Dum. This shape makes it possible to create a small garden, beneficial for the new apartments, as well as for the street, which lacks open spaces. Rue de la Verdure has a more complex structure and it makes a fold in the alignment at the side of the plot. The architects have opted to make use of this irregular geometry to give character to the development and a significant energy in the expression of the elevation.»
