

Project	ATC AT THE ATHÉNÉE ROYALE OF SOUMAGNE	23, Quai Mativa 4020 LIEGE
Architects	BINARIO ARCHITECTES	Tél : 04 344 53 00
Address	Soumagne	info@binarioarchitectes.com www.binarioarchitectes.com
Programme	The ATC (Advanced Technology Center) is a workshop-classroom built at the Athénée Royale of Soumagne with the task to train users coming from all sectors (High school, company, employment services) during a limited period of time. There is a main workshop with high-technology, classrooms and other functions such as front desk, rest area and cloakroom.	OTHER PROJECTS :
About	<p>The ATC is part of a global reflexion over the whole site included in a masterplan established by the project authors. It was necessary to solve the anarchic spread over time. The masterplan cares about the inherent constraints according to the site and defines new guidelines for the next plans. The ATC construction represents the first phase.</p> <p>The building is accessible from the existing pedestrian path and is settled in a vast field next to égalité street. Its location, between the main path and that street, gives visibility from it and from the school. The project stands out because of its industrial expression and its location and confers a strong embedded value. This is not about creating an object or an island but a landmark for the school site and the égalité street. The building stands between the school and the outer world, being a training tool for both. It is therefore a place of interaction and exchange. The buffer zone left between the street and the northeast façade has a semi-public purpose that will be more assertive during the next construction phases related to the masterplan.</p>	<p>5 Social housing units low-energy construction, Jupille. - 2006 2015 - Jupille</p> <p>Water mill Paix Dieu, Amay. - 2005 2013 - Amay</p> <p>Visitor Center in the mill of Villers-la-ville Abbey - 2010 2016 - Villers-la-Ville</p> <p>12 Social Housing in Stavelot - Stavelot</p>
Typology	Education	
Status	Built	
Conception	2009	
Delivery	2014	
Client	Fédération Wallonie-Bruxelles - Administration Générale des Infrastructures	
Total budget	569.600	
Stability	JZH & Partners	
Special techniques	JZH & Partners	
Landscape	Bjorn Gielen
