Address

Bruxelles

Programme

Extension and renovation of a single family house.

About

Originally built in 1955 by Simone Guillissen-Hoa, this building was entirely renovated, notably by extending its living spaces. The reorganization of its interior was focused on making those spaces loftier while the night area on the upper level has been restructured.

The choice of timeless materials such as Belgian bluestone, wood, ardesia and antalya stones complement this revisited house with a serene atmosphere.
