A BLADE BETWEEN TREES

Project	
Architects	LEDROIT PIERRET POLET ARCHITECTES
Address	Place des Paniers, 1348 Louvain-La-Neuve
Programe	Construction of a building of 49 social housing for students
About	The project is a new construction project of 49 social housing units for students (the first building of social kots in Belgium), on the place des Paniers in Louvain-La-Neuve. The project is part of the pedestrian context of Louvain-La-Neuve. It is located at the end of Place des Paniers on a very narrow plot bordering the access to the city's underground car park. The building slips into this plot to form the fourth missing facade of the square. The redents of the site are intended to preserve the existing pedestrian walkways and the sunshine of the neighbouring buildings. This new building acts like a puzzle piece that fills a void and stitches up pending elements. Translated with www.DeepL.com/Translator
Typology	Housing (include mixed use)
Status	Built
Conception	2013
Delivery	2015
Client	Notre Maison, société de logements de service public
