EXHIBITION CITIES CONNECTION PROJECT REACTIVATE THE CITY IN BRUSSELS

Wallonia-Brussels Architectures presents its new exhibition Import WB _Export BCN. Re-activate the city, curated by Nicola Regusci and Xavier Bustos. It will be on display from October 18thtill November 18th at ULB - Faculty of architecture La Cambre-Horta.

This exhibition takes place within the framework of the partnership proposed to WBA by Cities Connection Project (CCP). CCP was created with the desire to establish a cultural connection between two European cities with an important architectural and cultural tradition. The cities of Zurich, Mendrisio, Geneva and Lausanne were involved in the previous editions.

Each event, called Connection, consists of an exhibition in both participating cities and offers a new theme that always takes into account the idiosyncrasies and the cultural and architectural background of the invited city or region. This edition is centered on the re-use of existing spaces, the mixed use and the reconstruction of the city.
