L'ARCHITECTURE D'AUJOURD'HUI: BELGIAN ISSUE

The lastest AA issue, dedicated to Belgian architecture, is now available in bookshops.

If there is well a more and more visible scene, it is the one that V+ , Hebbelinck, Baukunst develop since a few years (...) All have as common denomiator to have made its letters patent of nobility, while offering it an international influence, in a profession a time held in contempt in Belgium.

The Belgian architects master the art of the palimpsest as much as the budget of their projects. Between History and stories, boldness and control, the Belgian scene is from now on means of quality, humanism and poetry.

Emmanuelle Borne - L'Architecture d'Aujourd'hui

Publication 03/07/18
