LAUNCH OF THE WBA WEB SITE

The WBA Website provides architects (and related professions) from Wallonia and Brussels with an incomparable international platform to showcase their work. This bilingual French/English Web site targets our many foreign partners, both public and private, allowing them to check out the vibrancy of our talents. It also offers our creators access to constantly updated information on international competitions, the fairs and biennials attended by WBA and its partners. A great deal of care has gone into the graphic identity and ergonomics of this dynamic and well-referenced site: following a call for tender, the graphics and the concept were entrusted to Salut public and the development to Bien à vous. Do not hesitate to contact WBA should you have any suggestion or question. We hope you enjoy discovering all we have to offer!
