NEY & PARTNERS WINS COMPETITION FOOTBRIDGE IN BOURG-EN-VALENCE (FR)

Fitting in the large refurbishment plan of the riverbanks of the Rhône, the new footbridge will replace the existing bridge that crosses the A7 motorway and will offer an easier and more comfortable access to the Girodet island. With its 23m high mast this new cable-stayed bridge will be an eyecatcher and a signal for the city. The new theater front plaza and the riverbank park are designed by the landscape architect Michel Desvignes. The design team, leaded by Ney & Partners, is completed by the landscape architect Eric-Pierre Ménard, the civil engineering office Otéis and the light designer Scène Publique.
