## BURO II & ARCHI+I

### Description

From two architectural offices dating back to 1979, BURO II & ARCHI+I has grown into a multidisciplinary office committed to offering a professional approach to all your projects. You benefit from the services of a team with know-how and experience that works in an extensive network from a baseline of shared values.

#### A professional team with experience

Through a very broad diversity of projects (from small to large and from A to Z), we not only have in-house specialists with many years of experience in various fields, we also have established collaborations with external specialists.

#### A tailor-made network of partners

For each project we establish relationships with partners who we know will help us create added value for your project. As well as bringing together the public and private sectors, we make sector-overarching links to gather knowledge and to learn from each other.

#### Four values that guarantee a quality result

The way we undertake projects is based on permanently applying values that reinforce each other: socio-cultural value, experiential value, building-technical value and economical value.

Together we look for the focus points within each value in order to find innovative and technically sound solutions. This way of working allows us to raise your project to a higher level. &#8195;
