Architects

K2A SPRL

Description

PROFILE

K2A is an innovative office created thanks to the complicity of two architects with diverse international backgrounds. The projects result from a close dialogue and participation between the clients and those involved in their elaboration, from the city council to the construction worker.

The architects and designers in the office continuously work with inventive consultants offering creative solutions to specific issues. They are dedicated to design excellence and strive to contribute positively to the human environment.

The office specializes in architecture, interior design, urban planning and strategic programming. Located in Brussels, K2A works on various types of buildings in Belgium and other neighboring countries.

DESIGN APPROACH

The design process starts with a clear understanding of the clients? needs and the dynamics of the brief. This is then translated into significant conceptual foundations. While focusing on cultural and physical characteristics of the site, imposed deadlines, cost control and sustainability, K2A?s projects generate a strong identity and an aesthetic integrity. The practice offers innovative solutions to complex problems and composes meaningful spaces to enrich the human experience.

Creation

2003
