Description

COTON_LELION_NOTTEBAERT

Recent projects C_L_N show a specific urban approach: very architected projects based on a social and participatory approach. The association is particularly sensitive to the context, combining sensory subtlety at a specific resolution capacity. All qualities at the service of a focused reflection to the match between the direction of the project and its programmatic needs. Since 2002, C_L_N studied and built housing projects, socio-cultural facilities, shops, offices, ranging from 24m² to 4500m². Sustainable development, collective equipment diverse program components, project integration in complex and dense urban fabrics, relationship to a landscaped site, with users participation are issues we address regularly. The architectural projects are often conducted in cooperation from the beginning of the project, either with other architects, artists (J. Charlier, J. Glibert, R. Venlet ...), graphic designers, landscapers (E. Dhondt, Landinzicht Christopher Menzel, Secchi-Vigano), designers, engineers both in physical stability of the building and special techniques (JZH & Partners, Greisch, MK ingeneering, Khale acoustics), specialists of construction (building low-energy and passive wood, Jacques Bare).
