Architects

ATELIER D'ARCHITECTURE FORMA

Description

The FORMa* architecture studio are Benoit Nis en Julien Renaux, associated architect. Our studio is situated in Brussels (Uccle).

We prone an organic approach of the architectural process in which the project is conceived by the encounter of a building owner, a location and? an architect. The final design is the result of a sincere and profound relationship between these three actors.

Listening and observing, trying to understand, in the same time objectively analysing the needs, the desires, the constraints and the potential; we make the project grow into maturity.

Our volumetric language is contemporary and timeless, always pursuing the relevance of the intervention.
Dedicated to the occupier, the design is freed from the accessory in order to make room for the unhindered circulation of life. Aiming at the essential permits us to offer a generous architecture, whatever the scale, the budget or the affectation of the project are.
