Architects

OPLA ARCHITECTURE

Description

oPla Architecture plc is an architecture studio founded in 2011, with its current main activity focused mostly on sporting spaces, residential and commercial sectors. Within Micromarché, oPla architecture wishes to strengthen its capacity for innovation and to participate in the creative synergy that animates the premises, in order to develop various projects in relation with its professional activity, particularly with regard to the rationale of reuse, the life cycle of objects and materials in civil construction. In addition, some of the partners are active in the teaching of architecture, which could lead to additional synergies in the future

Creation
