Architects

VORTEX ATELIER D'ARCHITECTURE

Description

Since 2001, Paul Robinet, Jeremy Di Timoteo & Nathalie Ghellynck are growing an architecture workshop in Mons. VORTEX grows up taking advantage of complementarity between those three personalities with different trainings: one architectural engineer, one architect and one interior designer.

This variety of skills enables to explore and unify more deeply all angles of a project; so sweeping away stereotyped boundaries between those disciplines.
Vortex explores the new trends, techniques and materials, which allow to meet any kind of needs, from targeted item design to the carrying out of an entire project.
